Instructions for Taking ACS Credential Photos

Digital is the accepted format to send your photos for ACS DR Credentials. Experiment with your camera and get familiar with the way that it works. Remember you can check your picture on a digital camera very quickly and redo it if the subject blinked, the picture is blurry or the subject does not like their picture.

If you have questions call the office at 443-391-7253.

1. Background – a solid color background that does not reflect light is best. A royal blue piece of material draped over a door makes a great background.
2. Make sure the subject is in **focus**.
3. Take a close up of the subject. What is needed is a shot of head and shoulders. No lower than the middle of the chest. **Please do not crop**, we will crop to size needed to work on badge.
4. Put the digital pictures on a CD Rom or USB Thumb Drive or contact us for information how to send electronically, such as drop box / box etc.
5. Always **keep a backup copy** of the photos and the applications. They can get lost in the mail.
6. **Label each file with the person's name** that will make sure we get the right picture with the name.
7. We will mail the ACS DR Credential directly to the individual, unless otherwise directed.
8. If you wish to be notified when we have mailed the badges please include an e-mail address with your request.
9. We are unable to process the ACS DR Credential without the Date of Birth and the Driver's License Number. We can use the number from Social Security, Passport, Permanent Resident Card, State ID or other official Government issued ID in place of Driver's License number.
10. We must have a **complete & correct mailing address** with Zip Code to mail the ACS DR Credential.
11. Please ask applicants to **print clearly**. Make sure that the information is readable and complete.
